**Reference:** Interventional study to analyze the effect of mobile phone radiations on heart rate variability parameters and efficacy of Envirochip In improving the same

**Subject:** Ethics Committee notification of study result of above mentioned study.

Dear Sir,

This is to inform you that study on envirochip has been conducted successfully at the site in site staff to know the impact of mobile emission on HRV of the people and nullify the same. Result is given below:

**Result:** The study is approved by MIEC (Medanta institutional ethics committee and upon analysis of data it has been shown a reduction of 5.35% in HRV with usage of mobile phone for more than 2 hours in a day. The HRV of all the subjects were recorded.

After use of study device, subjects showed an increase of 7.7% in HRV. Data was recorded with help of Elite HRV Corsense Monitor, which is internationally certified equipment.

Thus, it can be concluded that Envirochip emission protector is capable of nullifying the negative effect due to excessive use of mobile phone usage on HRV.

Please provide acknowledgement for the same.

Yours truly,

*Praveen Chandra*
